KARTHIK GUDURU

AI Engineer and Developer

+91 9550946546 gudur.karthik9@gmail.com https://www.linkedin.com/in/karthik-guduru/

SUMMARY

I am an experienced AI engineer and developer specializing in deep learning and generative AI. I excel at integrating various AI APIs to build scalable applications and have a strong background in advanced AI models for computer vision. My work has been recognized with multiple awards, including the TCS Innovista Award, and I thrive at the intersection of technology, creative problem-solving, and innovation.

TCS DIGITAL (RESEARCH & INNOVATION - CTO)

AI Engineer

CMI

06/2022 - 03/2025

A company focusing on AI solutions and technology development.

- Developed a cost-free, stylized icon generation workflow using Flux, Comfy UI, and a locally trained LoRA models, achieving 60% faster output.
- Trained a custom LoRA model to produce icons at a specified resolution, reducing icon generation time by 40%.
- Streamlined production with LoRA's architecture, cutting computational resource usage by 30%.

EDUCATION

Bachelors of Engineering — GPA 8.3

Muffakham Jah College of Engineering and Technology

08/2018 - 05/2022 Hyderabad

CUSTOMER INTERACTIONS & EVENTS

- **Presented to the CXO of Qiagen**, showcasing how retrofitting our solutions to their products could enhance functionality and improve lives, fostering strategic discussions for future collaboration.
- **Represented TCS at Elecrama 2023**, cataloging over 800 IoT, AI, and self-driving startups, evaluating potential partnerships to integrate XR, AI, and IoT for innovation in future solutions.
- **Collaborated with senior leadership** at Verizon ,Total Energies, John Wiley & Sons, and Elisa, guiding CTO, CMO, and COO teams on the use of digital twins and AI integration in industrial applications.
- **Led discussions and presented at IMC Delhi 2023**, delivering multiple talks to stakeholders on the benefits of XR and AI, promoting cross-industry adoption of emerging technologies.

KEY ACHIEVEMENTS

LinkedIn Top Voice AI

Received recognition as LinkedIn Top Voice by the LinkedIn editorial team for contributions to AI.

Luma AI

Selected to Luma Ai closed creator program

TCS Innovista Award

Awarded the TCS Innovista Award for developing a Digital Twin using 5G in the Piloted Technologies category.

IEEE Chairperson

Chairperson for 2 consecutive years and conducted multiple events successfully

Research Insights Panelist Meta

Part of closed research panel member Meta Reality Labs

Represented TCS at IMC 2023

Demonstrated XR and AI to stakeholders promoting cross-industry adoption of emerging technologies

SKILLS

Comfy UI · Flux · Hugging Face · Computer Vision · Python · Pytorch · API · Vuforia · Deep Learning · Stable Diffusion Model Fine Tuning · LoRa · Machine Learning · Open Sea · Streamlit · Blender · IoT · Open Source · Stakeholder Engagement · Unity 3d · Photoshop · Augmented Reality · Animation · Virtual Reality · Arduino · Rapid Prototyping · Projection Mapping

PROJECTS

Stylised Icon/Vector Generator

08/2024 - 10/2024 CMI, Proactive

Stylised Icon/Vector Generator project.

- Developed a cost-free, stylized icon generation workflow.
- Trained a custom LoRA model to produce icons.
- Streamlined production with LoRA's architecture.

PROJECTS

Live Portrait

08/2024 - 08/2024 CMI, Proactive

Live Portrait project for character animation.

- Created near real-time character control using comfy UI.
- Utilized local machine RTX 3070 ti GPU.

Utilizing GenAi Workflow

07/2024 - 07/2024 Munch Museum

Utilizing GenAi workflow to create a movie.

- Produced a tribute video using Luma AI and modern AI tools.
- Integrated art history with AI for engagement.
- Streamlined visual and audio generation workflows.

Gen AI Driven AR

06/2024 - 06/2024 Munch Museum

Gen AI driven AR without glasses project.

- Produced 30 image sets using generative AI models.
- Developed an immersive experience without AR glasses.

Art Mediator

04/2024 - 05/2024 Munch Museum

Art Mediator chatbot project.

- Built a generative AI art mediator chatbot.
- Developed with advanced GPT APIs for functionality.
- Optimized hosting and interaction with Whisper API.

INTERESTS

AI in Immersive Technology

AI applications in immersive tech and digital transformation.

Learning and Exploration

Continuous learning and exploration of new tools for rapid prototyping.

Public Speaking

Public speaking and mentoring in AI, XR, and immersive technologies.

Interactive Experience Creation

Exploring tools for creating interactive, AI-powered experiences.
